

Canoga Park High School Veterinary & Environmental Sciences Magnet Future Farmers of America Alumni and Boosters Club

The Veterinary & Environmental Sciences Magnet Program at Canoga Park High School is one of the most unique programs in the Los Angeles Unified School District, offering students the opportunity to learn the various facets of Agricultural, Veterinary and Environmental Sciences.

The Future Farmers of America Alumni and Boosters Club is a volunteer group which has been founded to help the students. Our goal is to raise funds to provide items that CPHS and LAUSD are unable to provide, such as financial assistance for trips, events, farm supplies and equipment, etc.

Please show your support of our program and join us in supporting our students.
